Projects

News web App 🔗
REACT JS| CSS| EXPRESS JS| NODE JS | REST API

1. Developed a high-performing news website using React, Express, and Node js with enhanced user experience.
2. Featured advanced techniques such as Context API, Memo, and HOCs, to optimize 100% data utilization of articles.
3. Implemented login and sign up features using bcrypt for password hashing and JWT token.

Personal Portfolio 🔗
JAVASCRIPT | BOOTSTRAP | REACT JS

1. Created a personal portfolio webpage to showcase my skills, projects and my tech interests during my 4 year B.Tech.
2. Implemented react bootstrap along with react in order to improve the design and visuals of the portfolio
3. Used react js with advance techniques and deployed on netlify successfully.

Event-Buzz website 🔗
JAVASCRIPT | CSS | REACT.JS | EMAIL JS

1. Designed an event planning website to facilitate the smoothness of event planning process.
2. Used third party service provider email js to added functionalities like getting mail from users for the service requests.
3. Worked in a team of two in college tech club and learned about sharing responsibilities and understanding each other.

Redpoisitive 🔗
JAVASCRIPT | CSS | REACT.JS

1. Resolving The issue of non-responsiveness in the original website, which was limited to a minimum width of 800px, has been resolved, and the website's responsiveness has been enhanced to accommodate screen widths as narrow as 280px.through clean code solutions, representing a major improvement over the original.
2. Features and Learning Features for receiving emails were included, enhancing the website's user-friendliness even further.
